

# lathe machine inspection checklist

Progress  0%

Take some time to inspect your lathe machine. Here are some things to look out for when doing a lathe machine inspection:

Status	Step
<input type="checkbox"/>	STEP 1: If you notice oil leaking from the lathe, you should have the machine checked by a professional.
<input type="checkbox"/>	STEP 2: Check for dented rollers on the spindle assembly.
<input type="checkbox"/>	STEP 3: Check for rust or pitting in all moving parts on the machine.
<input type="checkbox"/>	STEP 4: Make sure that all of the gears in your machine are still intact and turn smoothly.
<input type="checkbox"/>	STEP 5: Make sure that all of the bolts and screws are tight and in good condition.
