

# Lathe machine maintenance checklist

Progress  0%

Status	Step
<input type="checkbox"/>	STEP 1: Check the oil level daily.
<input type="checkbox"/>	STEP 2: Check the speed control knob for looseness and smooth operation.
<input type="checkbox"/>	STEP 3: Clean the worktable surface periodically with a damp rag to remove metal chips, swarf, or dust.
<input type="checkbox"/>	STEP 4: Avoid dropping tools or workpieces into the headstock; they could get caught in gears and damage them.
<input type="checkbox"/>	STEP 5: Keep all mechanics tools within easy reach.
